Dear Ms. Ruiz,

Warm greetings of Peace!

What is the role of education in today's world? How can I be more effective as an educator to bring about necessary changes in our schools and communities to contribute to a more sustainable future? What needs to shift in me?

These thought provoking questions will begin the 4-days **Teachers' Training for 21st Century Basic Education** (Education for Sustainability and Systems Thinking for K-12) on **September 8-11, 2011**. Venue will be at the **OCCI Center for Learning, 6th Floor Emerald Building, F. Ortigas Jr. Road, Ortigas Center Pasig City**. We invite you to join us and send participants per division. Ideal combination would be one (1) Supervisor, two (2) Principals and three (3) Teachers per division for team learning and cascading.

The participants will bring home the following after the 4days Training the Trainer Workshop:

- Start up modules to introduce systems thinking in the classroom
- See the connection among the various subjects for a more integrative approach to teaching
- Activities that will engage students to see real life challenges that will give them the opportunity to apply critical thinking and creative problem solving
- Exercises on how to use systems thinking as a way for children to express themselves
- The habits of a systems thinker as a values formation tool to develop the Filipino Youth to become responsible citizens of the country and the world
- Innovate ideas to promote sustainable education in your schools and communities
- Articles and website access to continue your learning as part of Snowball Philippines community
