10 September 2009

Ms. Victoria Q. Fuentes  
Quezon City Supervisor  
Department of Education (Dep Ed)

Through: Ms. Betty C. Cavo  
Assistant Superintendent

Greetings!

In line with STI College Quezon Avenue's social responsiveness program, we will be conducting events which will benefit the high school and elementary students. One of these events is we dubbed as "Computer-Aided English Enhancement Program", a training program specifically intended for Senior High School and Senior Elementary Students.

Our school is fortunate to have acquired *Auralog-Tell Me More Program*. This is a computer-based-teaching-English enhancement tool. It provides authentic samples of communicative situations (i.e. introduction, in a party, describing ones' family, etc.) where the students are asked to give correct responses based on these situations. The program helps enhance students' macro skills (reading, listening, speaking, reading and writing) through computer games and activities.

We have attached the training module of the project for your reference. We will conduct the said project starting November 2009 at STI Quezon Avenue Campus.

In this regard, we wish to request again your kindest endorsement of this project to public and private schools in Quezon City. Our Career Adviser, Mr. Dennis delos Reyes, will be closely coordinating with your Office in this connection. But should you have initial concerns or questions, please feel free to call us at 413.1180 or at 411.8065.

We are confident that through this project we can continue fulfilling our shared commitments to our elementary and high school students by empowering them beyond what they learn from the confines of their schools.

Thank you very much and best regards.

Very truly yours,

Marietta B. Soriano  
School Administrator

## Computer-Aided English Enhancement Program for Grade School and High School Students

STI College Quezon Avenue is an educational institution that firmly believes in the basic ideals of community service through quality education. This institution is very fortunate to acquire *Auralog-Tell Me More Program*. This is a computer-based-teaching-English enhancement tool. It provides authentic samples of communicative situations (i.e. introduction, in a party, describing ones' family, etc.) where the students are asked to give correct responses based on these situations. The program helps enhance students' macro skills (reading, listening, speaking, reading and writing) through computer games and activities.

Through this project, STI-QA will help strengthen the English language ability of the selected Grade school and High School students. This is our way of thanking the very community that helps nurture our institution.

The students will have a three hour-two day session for two consecutive Saturdays.

At the end of these sessions, the students are expected to:

- listen and produce the correct responses in the given exercises and tests;
- comprehend authentic American English samples and respond accordingly;
- brush up on their basic idioms and recognize the meaning and significance of the changes in voice inflection and other nuances of the American English language;
- review basic grammar through games and simulations; and
- feel confident about the way they use the English language.

	Day 1	Day 2
8:30-10:00	Introduction & Orientation on the Tell Me More Program	Session 3 Grammar Structure & Writing
10:00-10:30	Session 1 Listening - Speaking	Break
10:30-12:00	Session 2 Listening - Writing	Session 4 Speaking with the Proper tone and intonation
